MONK MENTAL

Effortless chop handling, amazing carving, perfect edge control and never a drop in your eye. 8 years later and winner of multiple “Board of the Year” awards the Monk is living proof that in a world of compromises there is still something special and unique to be found.

After years of tweaking, fettling and honing we feel we’ve grasped better than ever all the features that made this the most loved freeride board in the world. Grippier, slashier, speedier... How much more fun can you have? If you’re idea of kiteboarding is ripping, gouging and all round high speed fun then

look no further. The ultimate board that revels in all conditions and somewhat ironically improves exponentially as the conditions deteriorate – when it comes to outright enjoyment, no matter what, no other board even comes close.

Bi-lateral tip flex, constant curve rocker, Squoval 3 mould shaping... Does it really matter? We packed in all the technology you need... Kiteboarding is about freedom and non-conformism, The Monk will let you ride how you feel and feel how you ride and don’t let anyone tell you there is any other way.

MONKETTE GUMBUBBLE

The Monkette Gumbubble is the Shinn honed to the demands of the fairer sex. Designed to offer high and yet accessible performance in a silky smooth package this is a dream ride for both playful and demanding ladies alike.

Unashamedly born from the DNA of the Monk the Monkette brings ease, control and performance into the ladies kiteboard sector. Our SQ3 mould technology, progressive concave and constant curve rocker deliver outstanding grip, effortless chop handling and superb, easy to access POP, all combined with one purpose in

mind – making your moves bigger, smoother and more effortless. Big air, carving or freestyle the Monkette won't hold you back - don't let your board dictate to you, you choose how you ride.

Probably the most relevant female kiteboard on the market today and living proof that in a world of compromises there is still something special and unique to be found. Ladies, don't make life harder for yourself riding your partners cast offs demand what you deserve and claim this fine treat for yourself.

SNEAKER 6

A man with curly hair is kiteboarding, holding a yellow handle. He is wearing a black harness and a black board with a rainbow-colored stripe. The board has the word "RONSON" in large black letters and "SHINN" and "PLAYER" in smaller letters. The background is a clear blue sky.

RONSON PLAYER

Radical POP, amazing grip and outstanding control. Ronson fulfils your demands as a dynamic kiteboarder not willing to be limited by conditions or riding style. Never before have we created a board that bridges the gap between freestyle and freeride so effortlessly.

Welcome to the best of both worlds. One board designed (and delivering) the holy grail of edge control for boosting, hard POP for freestyle, chop munching flex control and buttery smooth landings (even when things don't go to plan). Our combination of technologies offers previously

unheard-of levels of comfort in a performance board. The split concave increases edge grip for a more explosive POP and at the same time dissipates impacts saving knees during hard landings and choppy waters alike whilst the Double Stepped Tips re-direct water as it exits the boards cutting drag and increasing directional stability without the need to resort to over sized fins.

Gone are the days of needing multiple boards to cover every set of conditions – X-over/Enduro call it what you will if your riding style combines all riding styles depending on the conditions then Ronson is surely the board for you.

ADHD CLINIC

The ADHD is our highest performance deck chosen by both competition freestylers and wake style purist a like. Stiff enough to perform yet comfortable enough to enjoy, we employed all the technology available to ensure the CLINIC won't hold your riding back (so get your other excuses ready).

After an in depth analysis and identifying the key features needed in a freestyle machine we've engineered this board to perform. The split concave increases edge grip for a more explosive POP and at the same time dissipates the impact saving the knees during those sketchy kite low landings not to

mention reducing base wear if obstacles are your thing.

The Double Stepped Tips re-direct water as it exits the boards cutting drag and increasing directional stability without the need to resort to over sized fins (guaranteed to catch when you least want them too) and enhancing performance in less than full power conditions.

The ADHD Clinic is a true favourite of the pro-riders on the team and with a proven competition heritage let us take your level as high as you dare no matter if your preferences are boots, straps, flat water, natural kickers or obstacles.

BRONQ CRB4

Developed through an irrational pursuit of excellence - the Bronq was never about building a carbon board, rather using all the technology at hand to create a ride that is undeniably versatile, exciting and luxurious to ride. So special that one test puts it at the top of every riders "most wanted" list.

A much misunderstood word – freeriding is the ability to adapt your riding to the conditions of the day, your mood or simply your desires and the Bronq CRB-4 was born to facilitate that ideal. At it's heart is our ultra-light paulownia/balsa core wrapped up in a new blend of Bi and Triaxial

carbon cloth. This new and unique mix delivers a board that significantly eclipses all previous Bronq incarnations. Unlike traditional carbon layups, which can be light but extremely stiff and nervous, it offers extreme flex and chop eating ability without the "spongy" feel that hinders many high flex decks. Massive grip for booting, effortless glide no matter the water state and radical carving ability mean you don't have to go extreme in your riding but if you want to the Bronq will help you achieve heights that you'll never have seen before.

PINBOT RX3

Amazing upwind performance at all power levels, un-believable chop handling and full service carving, loading or transitioning. The all new Pinbot RX3 is the board that gives you the fastest way to master your riding in a myriad of conditions allowing you to approach your kiteboarding with an all-round confidence in your deck.

Totally intuitive to ride and infinitely versatile the Pinbot RX3 incorporates our renowned forgiving ride qualities making it the perfect board to help complete the moves that may need some polishing. Fast and enjoyable progress without the fear of out growing their ride as their level progresses.

Rather than de-tune one of our higher performing models, we developed the Pinbot from the ground up combining all the features to be found in our award winning range. Never a drop in the eyes whilst riding, almost super-human durability and what would be range-topping weight for most other brands. You won't be moving on from this board because you out-grow it.

Focus on what **you** want to do, not what your board allows you to do. The Pinbot RX3 will push your game to the next level.

BERNHARD

Maximum fun, minimum wind. Bernhard is a new model and a new category for Shinn and has only one mission – increasing your days on the water with amazing power efficiency and unbelievable upwind ability whilst all the time keeping your riding fun.

Kiteboarding is fun and more kiteboarding is better than less kiteboarding. We don't all have the luxury of perfect conditions when we have the opportunity to ride - it's not all about megaloops and handle passes, the unexpected days of lightwind cruising are often just as enjoyable as their windier counterparts. This is a board unashamedly

directed towards those previously frustrating days were your freestyle model just won't come to life.

Using an adaptation of our Split Concave base Bernhard provides an exceptionally early planning, smooth and comfortable ride with upwind performance that will surprise and delight. The Bilateral flex tips iron out the chop and enhance grip when the wind starts to fill in. Playful and forgiving with sublime handling and superb comfort, designed for the pure love of kiteboarding, Bernhard is set to become an instant classic.

KING GEE SEA KING

King Gee – Sea King delivers something unique and stand-alone as the best move-orientated lightwind board available today. Designed to let you both increase your water hours and improve your skills in sub-optimal conditions you can even ride the King as the wind fills in – no need to rush back to the beach for something smaller.

Combining amazing light-air and upwind riding with a deck truly capable of performing manoeuvres was once the stuff of dreams yet King Gee's understated design has been tuned and optimized to create what was previously considered an impossible wind range for performance. Instigator of unexpectedly epic light

wind sessions this deck goes far beyond what can reasonably be expected for a light wind board.

Featuring a rocker significantly flatter than you might expect, the Sea King promotes early starting and effortless glide however when you're looking to perform (or simply riding in choppy water) the bi-lateral flex

tips come into play providing carving, edging and POP normally associated with a higher wind range dedicated design.

King Gee is truly a step forwards in sub-ultimate conditions enhancement, if you wish to maximise both your time on the water and the quality of those sessions then look no further, this is the only deck for you.

THE TIMELESS VELCRO SYSTEM ALLOWS FOR A HUGE ADJUSTMENT RANGE YET STILL MAKES MICRO ADJUSTMENTS A BREEZE, OUR 3D HEEL CUPPING ENSURES THE PAD IS PERFECT FOR EVERY FOOT NO MATTER THE SHAPE AND SIZE. GRIP TO STOMP YOUR LANDINGS YET EASY ENTRY AND EXIT WHEN YOU NEED IT

– **SNEAKER 6, A NEW CLASSIC.**

SNEAKER

SRS

IN A QUEST TO DISCOVER THE ULTIMATE CONNECTION WE TURNED TO BOTH THE WINTER AND TWO WHEELED SPORTS FOR INSPIRATION. TESTED AND APPROVED THROUGH MANY SEASONS THE RATCHET SYSTEM HAD BEEN TIME AND AGAIN PROVEN TO PROVIDE RELIABLE, TROUBLE FREE AND MICRO ADJUSTABLE SERVICE. “SET AND FORGET” OR EASILY ADJUSTABLE EVEN WHILST ON THE FLY, NO WEBBING OR VELCRO SYSTEM CAN EVEN COME CLOSE TO THE PRECISION AND EASE OF THIS DEVELOPMENT AND WHEN COMBINED WITH OUR 3D, FORM FITTING FOAM, MEMORY FOAM EQUIPPED, SUPER PLUSH PADS –

WELL, WE DON'T THINK THERE IS A LIGHTER, STRONGER, BETTER FITTING OR MORE COMFORTABLE SYSTEM ON THE MARKET TODAY.

SNEAKER

SRSW

IT'S ALWAYS A CHALLENGE TO CREATE A STRAP AND PAD COMBO THAT CAN BE ADAPTED TO THE NEEDS AND SIZE OF EVERY RIDER (IMAGINE ONE SHOE DESIGNED TO FIT EVERY FOOT!) SO THIS YEAR WE'VE GIVEN UP THE FIGHT, SAY HELLO TO THE SNEAKER SRSW.

WITH NO FIDDLY WEBBING THE SRSW RELIES ON A TIME PROVEN RATCHET SYSTEM PROVIDING A SET AND FORGET CONVENIENCE TO STRAP ADJUSTMENT WITH EASILY REGULATED MICRO ADJUSTMENTS POSSIBLE TO MAKE EVEN WHEN ON THE FLY.

BASED ON THE HIGHLY POPULAR SNEAKER SRS THE SRSW HAS BEEN MODIFIED TO PROVIDE A BETTER FIT FOR RIDERS WITH A FOOT OF UP TO EURO SIZE 41.

DIRECTIONALS

Shinn

SHINNSTER ENCORE

An instant hit when launched in 2014 the Shinnster never fails to put a smile on your face regardless of the conditions. For 2018 we took a step back to see what we could tweak and improve to make this the favourite 2nd board for every rider.

What is the Shinnster? It's not a wave board and it's not a skimboard.. the Shinnster is a kiteboard designed for strapless riding. Flat water skate style, small onshore wave playing, no fins, 80mm fins.... There are no rules, grab it and do whatever comes to mind.

Maintaining the rocker and flex pattern from the original this overhaul makes the Shinnster more compact and "trickable" without influencing the critical rail length needed to achieve the powerful upwind and drive it's famous for. Our all new Jet Stream tail channels increase the tail grip whilst using smaller fins to provide a better balance of sliding skate style moves and a more aerial style. Supplied with 53mm fins, add the new 3D shaped deck pad and 80mm fins to tune your ride how you like it.

The all new Shinnster is not only fun to ride but surprisingly easy to get the best out of too. Don't confuse this board with other similar looking concepts out there, this is a high performance ride that works in a huge array of conditions.

JACKSON

Jackson exploded onto the scene and rapidly gained a following as the freeride foilboard to have. Tough snowboard construction, massive stiffness, easy to handle and more than tolerant of touchdowns – for 2018 we've added an extra size of 130 to ensure there is a JACKSON for everyone.

We started with ideas, a list of all the features a dedicated foil board should have and then we innovated and tested until all the boxes were ticked. It's no secret that stiffness is critical when foiling and with Jackson it was the development of the bevelled rails that allowed us to incorporate the

rigidity so vital without resorting to heavy weight exaggerated core thickness or excess lamination. This key feature also reduces rail-catch when both carving tightly or driving hard upwind saving many a swim for the more aggressive rider.

JACKSONS wide, high lift nose ensures survival through occasional touchdowns and when combined with the flat tail rocker ensures essential efficiency crucial to starting in minimal wind conditions.

Fitted with our exclusive Trim-Tracks allowing fast and easy foil position adjustment each size can be ridden with multiple rider ability levels and styles. From first day beginner to freeriding expert alike – JACKSON fulfils the needs of all committed foilers.

THE RAISED RAIL FOAM ENSURES CATCHING THE BOARD DURING TRICKS IS BOTH COMFORTABLE AND EASY AND HOLDING ONTO IT WHEN IN THE AIR SECURE, THEY ALSO GO A LONG WAY TO REDUCING THE IMPACT OF PAINFUL RAIL-TO-SHIN STRIKES WHEN THINGS DON'T GO QUITE TO PLAN.

SHINNSTER

80 MM FINS

OPTIONAL EXTRA

THE NEW SHINNSTER ENCORE IS SUPPLIED WITH 53MM FINS FOR THE MOST VERSATILE SET UP POSSIBLE HOWEVER IF YOUR STRAPLESS STYLE INVOLVES CARVING AND AIR TRICKS THEN THESE **OPTIONAL EXTRA 80MM FINS WILL BE PERFECT FOR YOU TO PIMP YOUR RIDE.**

ADDING INSANE AMOUNTS OF GRIP ALLOWING YOU TO RIDE FASTER AND POP MORE AGGRESSIVELY THEY'LL ALSO LET YOU CARVE TIGHTER AND HARDER THAN YOU EVER THOUGHT POSSIBLE BEFORE.

HYDROFOILS

Shinn

Though not a new invention, foil-boarding has exploded in popularity over the last 2 seasons and few riders have still yet to see it's in-toxifying mix of speed, grace, and lightwind potential. Here at Shinn we love it and our innovative, ever expanding range of both easy to use and yet performance orientated foils is testament to our commitment to this sport.

Designed from the ground up (no OEM parts involved) and manufactured in our own production facilities our hydrofoil range has been sculpted and honed through our own learning experiences as foilers. Our highly intensive R and D efforts are focused on fulfilling the needs for **real world** riders not only Jedi-master world cup racers! Built with a fully modular mounting system

that allows easy and cost effective upgrades (any of our wings or stabilisers will fit to our fuselage and mast system) Shinn was the first brand to produce dedicated learning foils and foils built with real world durability in mind.

No longer the preserve of experts, innovations like our Model P have brought foiling within realistic reach of any competent twin tip rider, something that was simply un-thinkable even a few short years ago with many riders reporting their first foiling runs within 30 mins of their first attempts.

What starts for most as an ultra lightwind attraction will un-doubtably spread across your riding days as foiling's magical blend of efficiency, mobility and silent fun infects you – what's holding you back from joining us?

P MODEL

A sport limited to the rider elite only 2 years ago foil-boarding has come of age as riders of all ages and abilities look to take advantage of its benefits. When asking riders about their reluctance to foil the answer is always the same – it's too difficult and too dangerous, well we have news for you – the Shinn Model P has changed all that and continues to lead the way in unbelievably safe and easy progress right from day one.

Imagine making flying runs during your first 30 minutes with a foil... An impossible dream only 18 months past the Shinn Model P has bought foil-boarding within the reach of any competent TT rider and eliminated the frustrating and painful learning process of only a few short years ago. It's not just the extreme low speed lift (starting for as little as 10 kph) that makes it so easy

but also the predictable and progressive pitch control that eliminates the "rise and crash" scenes previously synonymous with learning to foil and for 2018 we've added the new larger ST3 stabiliser making it even easier than before.

Available with a wide variety of mast lengths for progression at all levels (40, 60, 75 and 90cm) you can also be sure your investment is not short lived as the foil structure features full modular compatibility with all other wings and stabilisers in the Shinn range allowing fast and cost-effective performance upgrades if and when you are ready for more.

MEGA K MODEL

New for 2018 the Mega K is the most versatile wing in the Shinn range. Originally designed with Surf and SUP in mind it's also proved to be exceptionally well suited to kite-foiling in waves and in extreme light winds. With a surprisingly high top speed for a wing of this size and yet still un-believable low speed starting (as low as 8 kph) Mega K leads us down the path of multi-discipline wings.

Designed to provide lift at low speeds and yet retain enough top end to keep it fun the Mega K provides stability and manoeuvrability making it perfect for SUP, SURF or Kitewave foiling in small to medium sized waves. Utilizing a low to mid aspect ratio wing with a high rake delta outline has allowed us to provide the massive speed range needed to handle both starting and control on the wave face. The main

wings blended winglets work with the flat stabiliser to give great directional stability without limiting the carving potential even at crazy slow speeds.

So why do we recommend the Mega K for extreme light wind kiting as well? Low speed starting is the key where the challenge is to generate enough speed to start foiling. With the Mega K the power needed to water start is already enough to fly and with a top speed in excess of 35 kph you'll be cruising when even other foilers are left sitting on the beach.

K MODEL

Speed range, stability, great pitch control and amazing carving. It reads like a shopping list for your next foil but the new Model K really does do it all. Inspired by the need for a foil to fill the gap between the impossibly easy to learn on P foil and high speed Model F, the Model K represents our vision for the perfect x-over, multi purpose foil.

Riding your P with ease but not looking to make life hard for yourself by moving onto a high speed, high technique dependant free race foil? The Model K was developed with “2nd season” foilers in mind and was designed to ensure your progress remains as fast and painless as your first season on the Model P was. Impressive low speed starting and

a high angle of attack stall resistance means you don’t need the footwork of a ballerina to master the tricky footswitches required for flying tacks and gybes and yet lock it down and pour on the power and the Model K accelerates and tracks assuredly with a feeling far more often associated with high performance race or free-race foils. Strapless action, light wind cruising, transition mastery – massive functioning speed range and easy pitch control mean the Model K fulfils the needs of even the most advanced foilers looking for something **other** than just flat out speed.

MODEL K FOIL

*X-OVER FREERIDE FOIL
DESIGNED FOR IMPROVER (CAPABLE OF MAKING 50M
OR MORE FOILING RUNS) TO ADVANCED FOILERS,
EXTREMELY WELL SUITED FOR TRANSITIONS, CARVING,
STRAPLESS AND ALL ROUND FREERIDING*

CARBON RE-ENFORCED MID ASPECT RATION WING

MEDIUM HIGH ASPECT WING 866 CM²

ST2 INVERTED PROFILE STABILISER

240CM² WITH INTEGRATED YAW CONTROL

VERSATILE SPEED RANGE

TAKE OFF AROUND 12 KPH WITH TOP SPEEDS > 45 KPH

STRIKE RESISTANT DESIGN

TOP MOUNTING FOR THE DELICATE COMPOSITE WINGS
PROTECTS THEM FROM ACCIDENTAL BOTTOM STRIKES

QUICK-FIT PLATE

FAST AND EASY FOIL ATTACHMENT TO ANY BOARD
WITH 165 X 90 PLATE SPACINGS WITHOUT REMOVING
THE SCREWS

MODULAR DESIGN

FUSELAGE COMPATIBILITY WITH ALL OTHER SHINN
WINGS AND STABILISERS FOR FUTURE,
COST EFFECTIVE UPGRADES

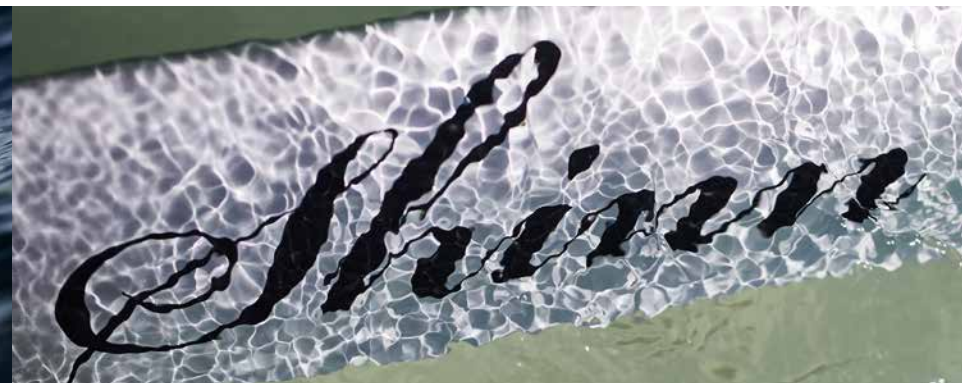

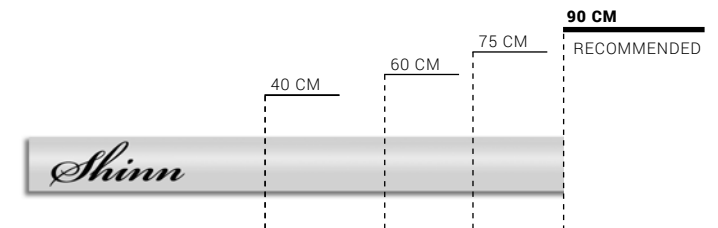

PADDED TRAVEL CASE

SUPPLIED IN A PADDED CASE FOR MINIMAL SPACE
AND PEACE OF MIND WHEN TRAVELING

MULTIPLE MAST LENGTHS

AVAILABLE WITH 40, 60, 75 OR 90 CM MAST
(RECOMMENDED MAST IS 90 CM)

F MODEL

Introduced last year the Model F foil is our fast freeride foil designed for intermediate to advanced riders looking for high speed freeride action. Capable of speed in excess of 50kph only full race foils are capable of higher speeds but none can match the pitch stability and easy handling of the Model F.

Designed, tested and produced with a true passion for the sport the Model F is designed to satisfy the desires of the more experienced foilboarder looking for fast upwind, aggressive carving, solid jumping and yet maintain enough pitch stability and low speed stall capability to be forgiving during those

challenging foot switches, tacks and gybes that can catch out even the most accomplished of riders. Perfect when matched with smaller boards the Model F was designed, like all our foils, with top mounted wings to ensure durability and rigidity should the worst happen and your foil meets the bottom unexpectedly.

Available with any of our mast lengths but recommended with 90cm and with modular compatibility to all our other wings and stabilisers - if you're looking for a fast, stable foil with high speed capabilities and well above average durability then the Model F will be hard to look past.

MODEL F FOIL

*FAST FREERIDE FOIL
DESIGNED FOR INTERMEDIATE TO ADVANCED RIDERS
LOOKING FOR HIGH SPEED FREERIDE ACTION*

CARBON RE-ENFORCED WING
MEDIUM HIGH ASPECT WING 580CM²

ST1 INVERTED PROFILE STABILISER
200CM² WITH INTEGRATED YAW CONTROL

VERSATILE SPEED RANGE
TAKE OFF AROUND 14 KPH WITH TOPS SPEEDS > 50 KPH

STRIKE RESISTANT DESIGN
TOP MOUNTING FOR THE DELICATE COMPOSITE WINGS
PROTECTS THEM FROM ACCIDENTAL BOTTOM STRIKES

QUICK-FIT PLATE
